

Team Name: Amazin

Date: February 17th, 2022 @ 12:00pm – 60min

Participants: Luca Dallaire, Liam Pereira, Julie Tat, and Mohammed Zahed

Absentees: Jean-Claude Abou-Elias and Youssef Morcos

Decision items

Sign up, login, user profile page -> Julie

Home page, products page (including adding new product to list) -> Luca

Youssef will be in charge of the database for the user's list.

Discussion items

We discussed the format of file that will be used to store data (user's information and product details). We will be using CSV file to store data temporally as we need to confirm it with all the back-end members. It is possible that it changes.

We also talked about essential pages that need to be implemented into PHP, such as sign up/login page, home page, product page, and user profile page.

Next meeting agenda

Combined the back end and front-end

Test the signup/login features.

Test the browsing item features.
