Team Name: Amazin
Date: March 9th, 2022 @10:00AM – 60min
Participants: Jean-Claude Abou-Elias, Liam Pereira, Youssef Morcos, and Julie Tat
Absentees: Luca Dallaire and Mohammed Zahed

Decision items

We decided how to implement/improve the following features:

- Browsing items: item database, filter queries (categories), search result page
 -> connect it to a database
- Shopping cart
 -> implement cart page, function to add/remove item, display price, verify with database
(stock)
- Posting items
 -> form page to get item information and add it to database, link item to specific user

Discussion items

We talked about features to be improved for sprint 3 and separated the tasks.

- Browsing items: item database, filter queries (categories), search result page
- Shopping cart: functionality to be implemented
- Posting item for sell: feature to be implemented

We also reviewed the project's new guidelines.

Next meeting agenda

The next meeting will be held to review sprint 2 features (to ensure everything is working).
