Team Name: Amazin
Date: February 21ˢᵗ , 2022 @9:00AM – 60min
Participants: Luca Dallaire, Youssef Morcos, Liam Pereira, Julie Tat, and Mohammed Zahed
Absentees: Jean-Claude Abou-Elias

Decision items

We allocated story points to user stories and discussed which one should be prioritized:
-> home page (public landing page)
-> product page (how the product will be display and where the products can be found)
-> Sign-up and login

Discussion items

Tested the project (team members show the work they implemented).

The products, sign-up, login, edit profile, and home page were shown. Most of them are working properly with some bugs that will be discussed later.

We reviewed the user stories as well as the project's new guidelines.

We allocated story points to every user story in order to prioritize the main features.

Next meeting agenda

Verify that the feature are working properly before the submission.
