Team Name: Amazin

Date: February 10, 2022   @10:30AM – 140min
Participants: Jean-Claude Abou-Elias, Luca Dallaire, and Julie Tat
Absentees: Liam Pereira, Youssef Morcos, and Mohammed Zahed

Decision items

Upon discussing about the implementation of the store's webpages, we decided to start by creating the home page, log in, and sign-up page.

Luca will be in charge of the home page.
The log in page will be implemented by Jean-Claude and the sign-up page by Julie.

We will start by developing these pages with a simple layout so that more features can be added later.

Discussion items

We discussed about the design of the store (webpage) as well as its implementation.
The layout and contents (form to be filled by users) of the webpages (home page, log in/sign up page, item display page, etc.) were also mentioned.
We talked about the sub-tasks of some specific user stories that were made in the previous sprint.
Their criteria were also defined.

The requirements of the sprint 2 were reviewed as well.

Next meeting agenda

In the next meeting, if all team members are present, we will discuss on how to implement the database of the store. The tasks of the sprint 2 will also be distributed.
